Key insights

Housing affordability

- Overall, more than 9,900 households in Moreland were in housing stress in 2016. The proportion of households in housing stress in Moreland is 15.3%.
- In 2017, 47% of purchaser/renter households felt that the rental or housing payment places heavy (11%) or moderate (36%) stress on the household's finances in an average month (Moreland Household Survey 2017).

Housing tenure

- 36% of households in Moreland are rented, equal to approximately 22,716 rented households (33% rented privately and 3% rented social housing).
- Over half (54%) of rented households are single family households, and one quarter (26%) of rented households are lone person households.
- In 2017, the majority of renters (71%) felt secure in their current rental agreement, with 39% feeling very secure. The main reasons for feeling insecure were that the property may be sold (65%) and rising rent (65%).

Safe & affordable housing

- In 2016, there were an estimated 1,090 in Moreland living in crowded or severely crowded dwellings.
- People aged 20-29 years make up over half (54%) of people living in crowded dwellings.

Homelessness

- In the past 12 months, Vincent Care provided Intake and Assessment (IAP) services to 823 people and the rental access program to 161 households.
- The homeless rate in Moreland was 94 persons per 10,000 of the population in 2016. This rate is well above the metropolitan average of 88 (Australian Bureau of Statistics 2016).
- According to the ABS homelessness estimates for Moreland, there were 770 people experiencing homelessness in 2016, however this is likely an undercount considering Vincent Care data.

Housing affordability

Measure: Households experiencing housing stress

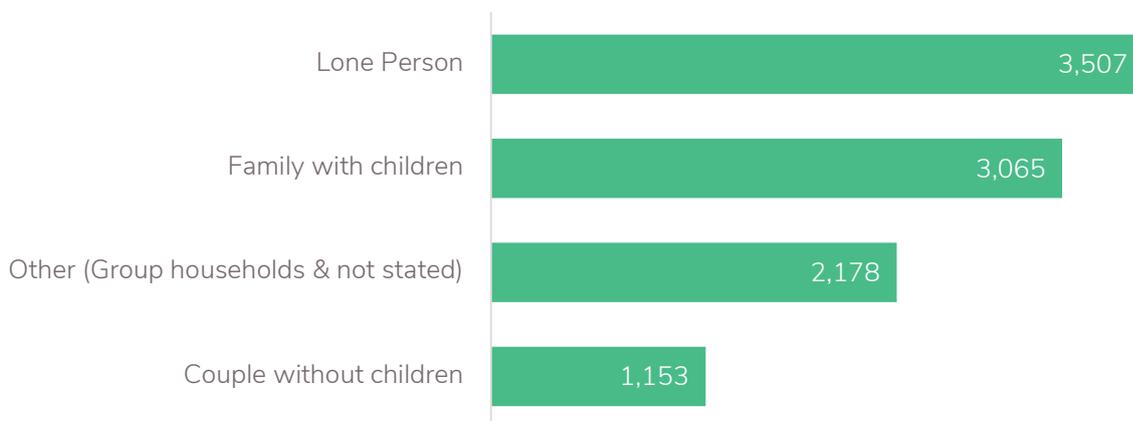

Housing stress refers to households having trouble meeting their rent or mortgage payments. Generally, lower-income households spending more than 30% of income on housing costs is considered housing stress, or generally unaffordable (id. Consulting, *A Home in Moreland*).

Overall, more than 9,900 households in Moreland were in housing stress in 2016. The proportion of households in housing stress in Moreland is 15.3%.

For information on households experiencing financial distress, see the [Moreland Households experiencing financial distress brief](#).

Household Type	Households experiencing housing stress	% households experiencing housing stress
Lone person	3,507	35%
Family with children	3,065	31%
Other (Group household & not stated)	2,178	22%
Couple without children	1,153	12%
Total	9,903	100%

Households experiencing housing stress by household type

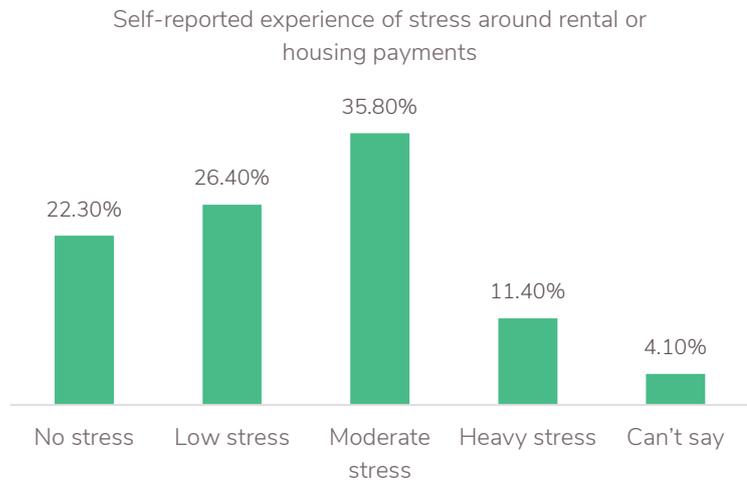

Source: A Home in Moreland Report, ID Consulting

Measure: People who experience stress around rental or housing payments

In 2017, 47% of purchaser/renter households felt that the rental or housing payment places heavy (11%) or moderate (36%) stress on the household's finances in an average month (Moreland Household Survey 2017).

Self-reported level of stress	% of respondents
Heavy stress	11.4%
Moderate stress	35.8%
Low stress	26.4%
No stress	22.3%
Can't say	4.1%
Total	100%

PANDEMIC

There have been both positive and negative impacts seen in housing affordability since the beginning of the pandemic. This is rapidly changing and therefore the situation cannot be comprehensively analysed. Housing affordability will need to be continually monitored as the situation evolves.

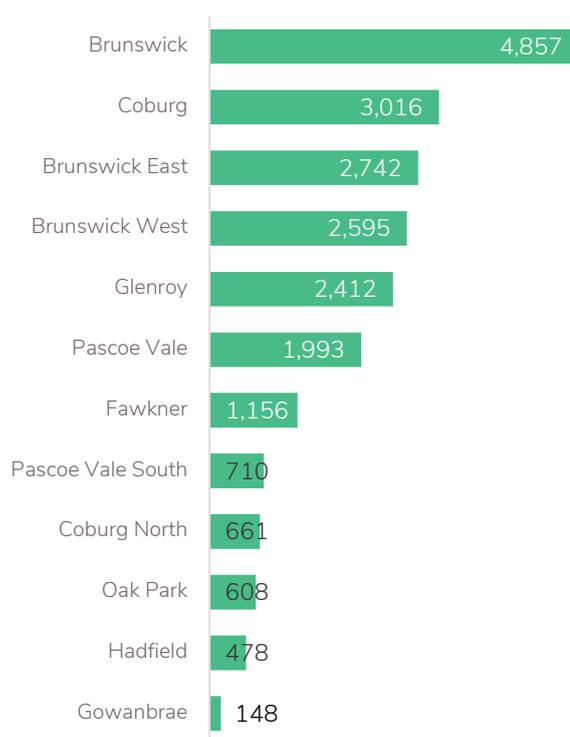

Housing tenure

Measure: Households that are rented

36% of households in Moreland are rented, equal to approximately 22,716 rented households (33% rented privately and 3% rented social housing). Over half (54%) of rented households are single family households, and one quarter (26%) of rented households are lone person households.

Table. Households rented privately by suburb

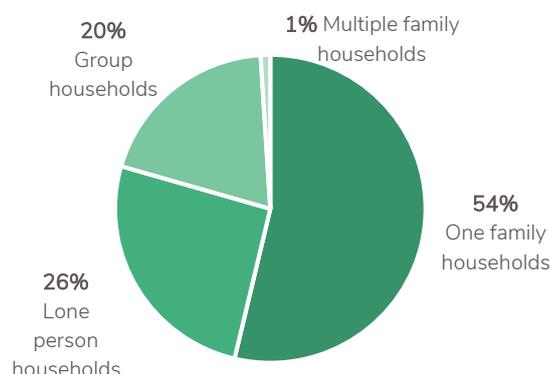

Suburb	Households rented privately	% of households
Brunswick	4,857	46%
Coburg	3,016	30%
Brunswick East	2,742	48%
Brunswick West	2,595	42%
Glenroy	2,412	30%
Pascoe Vale	1,993	30%
Fawkner	1,156	25%
Pascoe Vale South	710	19%
Coburg North	661	24%
Oak Park	608	26%
Hadfield	478	20%
Gowanbrae	148	14%
Total	21,450	33%

Source: Australian Bureau of Statistics population census 2016, Tenure by suburb

Table. Households that are rented privately by household composition

Household composition	Rented households	%
One family household	12,171	54%
Lone person household	5,835	26%
Group household	4,427	20%
Multiple family household	227	1%
Total	22,716	100%

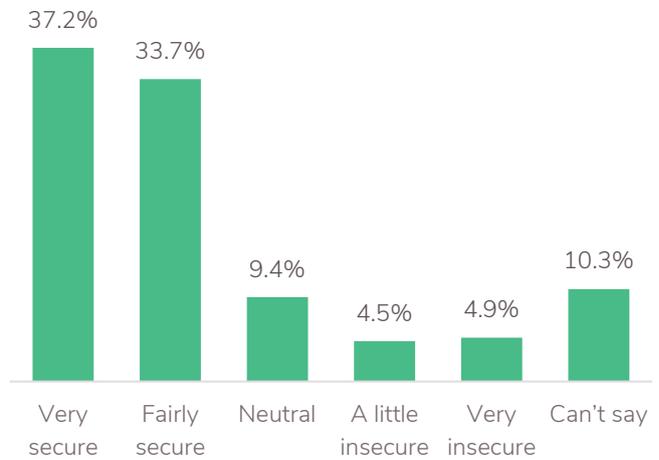

Source: Australian Bureau of Statistics population census 2016, Tenure by household composition

Measure: Households that feel insecure in their rental agreement

In 2017, most renters (71%) felt secure in their current rental agreement, with 39% feeling very secure. The main reasons for feeling insecure were that the property may be sold (65%) and rising rent (65%).

Table. Feelings of security in current rental agreement

Feelings of security in current rental agreement	% of respondents
Very secure	37.2%
Fairly secure	33.7%
Neutral	9.4%
A little insecure	4.5%
Very insecure	4.9%
Can't say	10.3%
Total	100%

Source: Moreland City Council Household Survey 2017

PANDEMIC

The VicHealth Coronavirus Impact Survey reported that 19% of respondents were concerned about the stability of their housing. (VicHealth, 2020)

PRIORITY GROUPS

Adults who identify as LGBTQIA+ are more likely to rent homes than non-LGBTQIA+ adults, they also have significantly lower rates of mortgages and home ownership (Victorian Agency for Health Information, 2017).

Access to healthy & quality housing

Measure: Overcrowding in dwellings

In 2016, there were an estimated 1,090 in Moreland living in crowded or severely crowded dwellings according to ABS Homelessness Estimates 2016. People aged 20-29 years made up over half (54%) of people living in crowded dwellings.

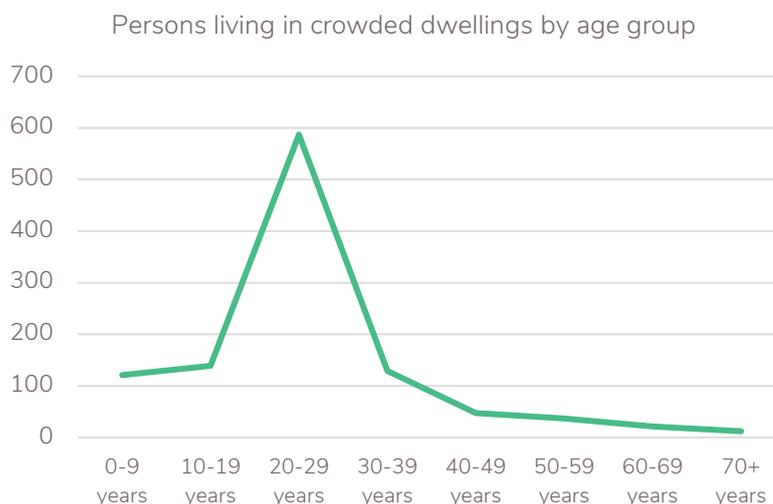

Table. ABS homelessness estimates for dwellings that are overcrowded

Overcrowding estimates	Population
Persons living in 'severely' crowded dwellings	336
Persons living in other crowded dwellings	758
Total	1,094

Source: Australian Bureau of Statistics Homelessness Estimates 2016

Table. Dwellings that are overcrowded by age group

Age	Persons living in crowded dwellings
0-9 years	121
10-19 years	139
20-29 years	587
30-39 years	129
40-49 years	47
50-59 years	37
60-69 years	21
70+ years	12
Total	1,094

Source: Australian Bureau of Statistics Homelessness Estimates 2016

Measure: Indoor temperatures of dwellings

Moreland City Council does not currently collect or have access to data pertaining to the indoor temperatures of dwellings. However, Council recognises that this is an important indicator to ensuring access to safe and quality housing.

CLIMATE CHANGE

Quality housing encompasses heating and cooling methods that improve the efficiency of energy used. With climate change projections of rising temperatures, it is important for houses to be equipped to manage such weather events. By using more efficient methods and better design less emissions are released and more energy can be conserved (Your Home, Australian Government, 2017).

Homelessness

Measure: People accessing Vincent Care support

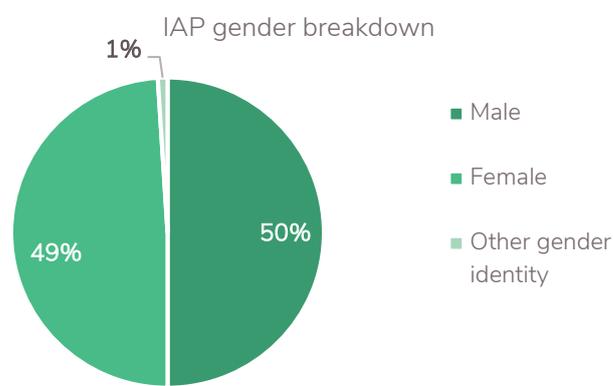

Vincent Care provides support to people experiencing homelessness in Moreland accommodating them in emergency options, and through the private rental access program by establishing new tenancies or providing financial support to retain the tenancy.

In the past 12 months, Vincent Care provided Intake and Assessment (IAP) services to 823 people and the rental access program to 161 households.

Their contacts are primarily rough sleepers, people experiencing housing unaffordability and housing crisis. Many of the people they support from Moreland are students and asylum seekers, and they tend to see an older demographic from the area seeking assistance. In IAP services, 50% of the people they supported identified as male, 49% identified as female, and 1% reported another gender identity.

Table. Number of people accessing IAP services from Vincent Care with Moreland addresses & close family contacts

Type of support	Number receiving support	Amount spent
IAP (front door) service	823 people	\$147,801
Private rental access program	161 households	\$291,912

Source: Vincent Care 2020

Measure: Homelessness rate estimate (ABS)

According to Australian Bureau of Statistics, a person is considered homeless when they do not have suitable accommodation alternatives or if their current living arrangement is in a dwelling that is inadequate; has no tenure, or if their initial tenure is short and not extendable; or does not allow them to have control of, and access to space for social relations.

The homeless rate in Moreland was 94 persons per 10,000 of the population in 2016. This rate is well above the metropolitan average of 88. According to the ABS homelessness estimates for Moreland, there were 770 people experiencing homelessness in 2016.

Table. Homelessness Operational Groups ABS homelessness estimates for Moreland

Homelessness Operational Groups	Total
Persons living in improvised dwellings, tents, or sleeping out	12
Persons in supported accommodation for the homeless	217
Persons staying temporarily with other households	80
Persons living in boarding houses	134
Persons living in 'severely' crowded dwellings	336
Total experiencing homelessness	768

Source: Australian Bureau of Statistics Homelessness Estimates 2016

PANDEMIC

People experiencing homelessness are at higher risk during the pandemic without regular access to safe and affordable housing and personal protective equipment.

CLIMATE CHANGE

Climate impacts will affect people in different ways based on their degree of vulnerability. All levels of homelessness (primary, secondary and tertiary) will be impacted by the changing climate. Those living on streets are more exposed to extreme weather events and those living in boarding houses or temporary shelters may not have access to adequate housing to remain cool and sheltered from extreme weather events. In conjunction with this homeless people also have more exposure to polluted airways and disease. This significantly decreases the likelihood of positive health outcomes.

PRIORITY GROUPS

Aboriginal Victorians are four times more likely to be homeless than non-Aboriginal Victorians (Korin Korin Balit-Djak 2017).

People who identify as LGBTQIA+ make up a large proportion of the homeless population in Victoria. Young people in particular are over-represented as often they feel unsafe at home or rejected (Department of Health and Human Service, 2017).

Domestic and family violence is the main reason women and children leave their homes in Australia and is consistently one of the most common reasons clients seek assistance from Specialist Homelessness Services (Australian Housing and Urban Research Institute, 2012).

Data sources

Australian Bureau of Statistics Census of Population and Housing 2016

The ABS Census of Population and Housing is a nationwide census of all households and residents. It is conducted every five years. The census collects data about the population including age, gender, relationships within households, usual residence, country of birth, language spoken at home, ancestry, education, employment, wages and religion. It also collects a small amount of household data.

The most recent data is 2016.

Australian Bureau of Statistics Homelessness Estimates 2016

The ABS Estimating Homelessness dataset estimates persons who are homeless or marginally housed as calculated from the Census of Population and Housing.

The most recent data is 2016.

A Home in Moreland Report, .id Consulting 2018

A Home in Moreland is a report prepared by .id Consulting on behalf of Moreland City Council. It contains a narrative about housing in Moreland now and in the future and identifies how need for housing is changing.

The most recent data is 2018.

Korin Korin Balit-Djak: Aboriginal health, wellbeing and safety strategic plan 2017-2027

Korin Korin Balit-Djak follows the government's commitment to self-determination for Aboriginal Victorians commissioned by the Department of Health and Human Services. This research and discussion has underpinned a new policy platform for health, wellbeing and safety.

Moreland City Council Community Indicator Survey 2018

The Moreland Community Indicators Survey is a bi-annual survey undertaken by Moreland City Council which asks residents to rate their level of agreement (or disagreement) with various statements. The data gathered concerns residents' perceptions of such issues as Council services, their local area, public transport, housing, economic circumstances, the environment and parks.

The most recent data is 2018.

Moreland City Council Household Survey 2017

The Moreland Household Survey is a bi-annual survey of randomly selected households undertaken by Moreland City Council. The most recent survey was conducted in 2017. The Household Survey has census-style questions about individuals and households, but also collects data about the use of Council services and facilities.

The most recent data is 2017.

Victorian Agency for Health Information 2020

Safer Care Victoria and VAHI were created as a part of government reforms to improve quality and safety across Victoria's public healthcare system.

VicHealth Coronavirus Victorian Wellbeing Impact Study 2020

A survey of 2,000 Victorian adults to explore how their health and wellbeing was affected during the first lockdown of 2020. The survey covered general wellbeing, social connection, healthy eating, physical activity, financial hardship, smoking, alcohol consumption, as well as working and home life.

The most recent data is from 2020.

Vincent Care 2020

Data provided from Vincent Care to Moreland City Council.

The most recent data is from 2020.
