

Unemployed and residents at risk of unemployment

This brief describes current unemployment rates and estimates of residents at risk of unemployment in the future.

Version 1.0 May 2020

In this brief:

Key insights.....	2
Further information	2
Unemployed residents in Moreland	3
Unemployment rate trends in Moreland	3
Current unemployment rate in Moreland by suburb (December 2019)	4
Residents at risk of unemployment by industry	6
High & low estimates for residents at risk of unemployment (May 2020)	6
Notes on data sources.....	8
Appendix 1: Baseline unemployment profile at 2016 population census for Moreland.....	11
Appendix 2: Lookup tables - residents employed by industry.....	12
Appendix 3: Lookup tables - residents employed by Suburb	22

Key insights

- **As of December 2019**, 5,930 persons were registered as unemployed Moreland (5.5% unemployment rate). The Moreland suburbs with the highest current unemployment rates are Coburg (7.4%) and Fawkner (6.8%).
- **Over the last year from December 2018 to December 2019**, the unemployment rate in Moreland has increased slightly over the last year from 5.4% to 5.5%. By comparison, the unemployment rate for metropolitan Melbourne in December 2019 was 4.7%.
- **Based on recent modelling of impacts of Covid19 on employment by industry**, we estimate between 8,600 and 24,400 people in Moreland may be impacted in the future by job loss or reduced work hours:
 - Residents employed in **Accommodation & Food Services (hospitality), Education and Training, and Retail Trade** are currently considered to be the most likely to be impacted. These industries employed a total of 22,223 Moreland residents, or 29% of working Moreland residents, at the last population census (2016).
 - 34% of residents employed in Accommodation & Food Services, Education and Training, and Retail Trade are **aged between 20-29, and 57% are female**.
 - Estimates of **future impacts on employment in the Health Care and Social Assistance are highly uncertain**. The health services sector was the largest industry of employment for Moreland residents at the last population census (2016), with 9,365 Moreland residents employed in this sector.
- This forecasted loss of employment will unlikely translate directly to an increase to the unemployment rate, as some impacted residents will be receiving Job Keeper payment by the Federal Government, may be unable to claim Federal assistance or may choose not to participate in the labour force for other reasons.

Note: Information in this brief will be regularly updated as further data and modelling becomes available. **The next quarterly data updated is expected by June 2020 and will provide unemployment data current to March 2020.** Please visit our website for the most current version.

Further information

This brief has been developed by the Moreland City Council Research Team. It is based on the most recent data available at the time of publication. This brief may be updated in the future, please check our website for the latest version. For further information email research@moreland.vic.gov.au or phone 9240 1111.

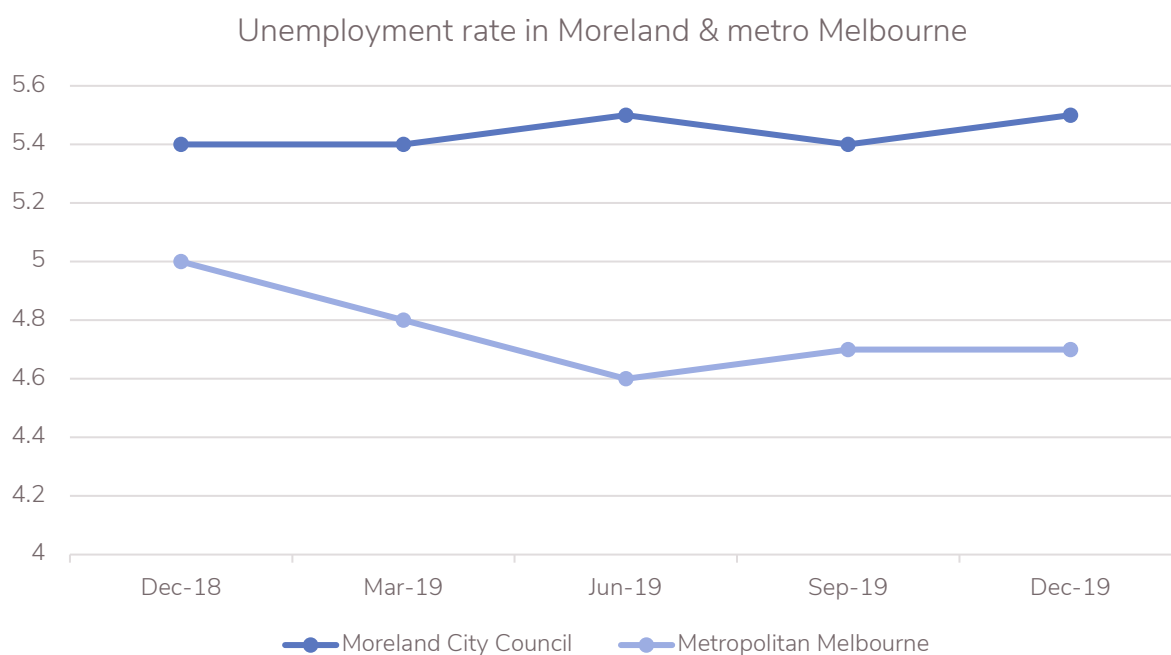

Unemployed residents in Moreland

Unemployment rate trends in Moreland

Small area labour markets (SALM) presents regional estimates of unemployment and the unemployment rate on a quarterly basis at the local government area (LGA) LGA and statistical area 2 (SA2) level, as well as estimates for metropolitan regions, including metropolitan Melbourne.

Unemployment rate in Moreland City Council and metropolitan Melbourne December 2018 - 2019

Region	Dec 2018	Mar 2019	Jun 2019	Sep 2019	Dec 2019
Moreland City Council	5.4	5.4	5.5	5.4	5.5
Metropolitan Melbourne	5.0	4.8	4.6	4.7	4.7

Source: Small Area Labour Markets (SALM) reporting on unemployment rate by SA2 2016-2019

Current unemployment rate in Moreland by suburb (December 2019)

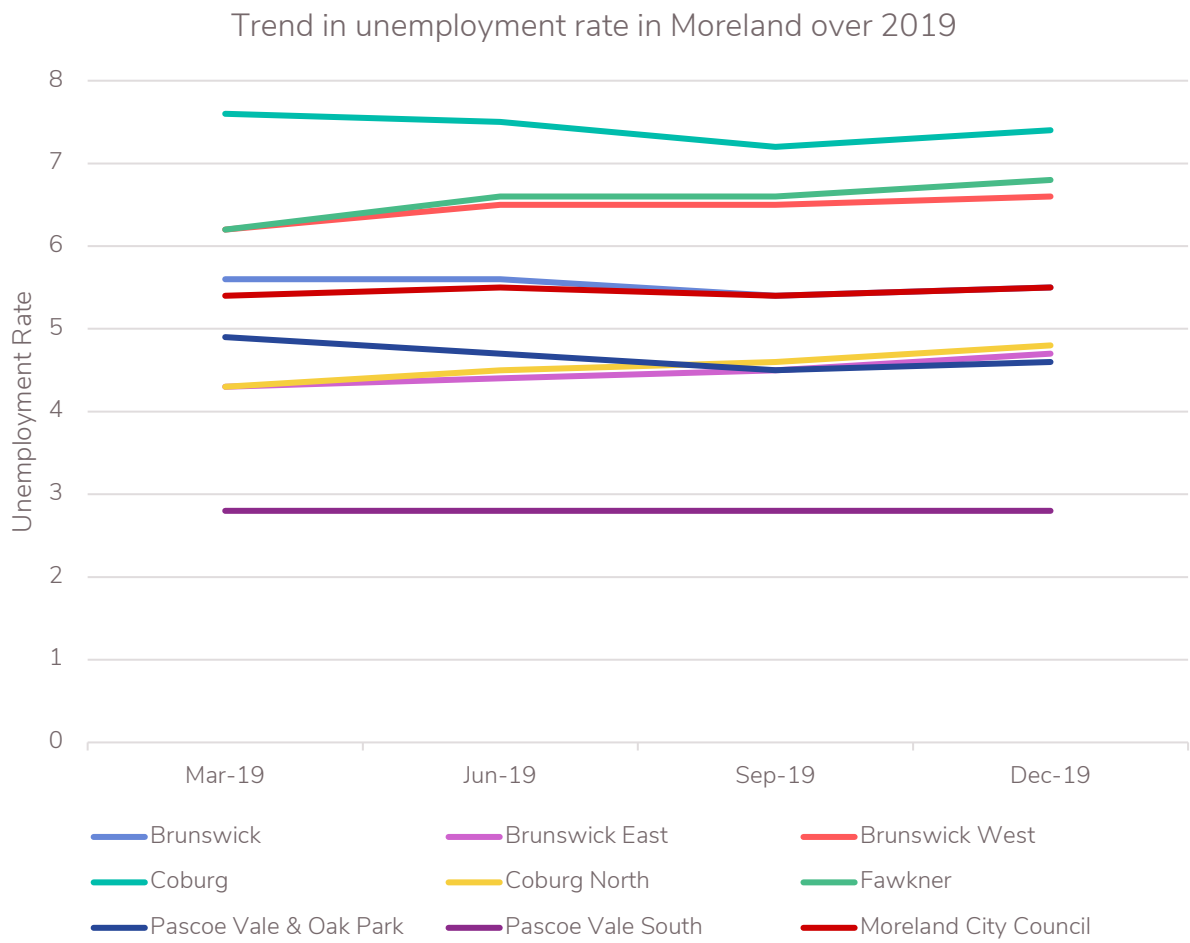

Due to changes in SA2 boundaries between the 2011 and 2016 Census, estimates are not available for every suburb in Moreland in the small area labour markets data.

Unemployment rate in Moreland SA2s December 2019

Source: Grattan Institute 2020, [‘Shutdown: Estimating the COVID-19 employment shock’](#)

Method 1: Alternative Method 1 – modelling based on social distancing and occupation and industry-level data to estimate the likelihood of job loss.

Method 2: Alternative Method 2 – expert opinion only using manually-estimated probabilities of job loss in industries and sub-industries.

Method 3: “preferred” combined expert opinion and social distance modelling.

Data limitations

- Where our estimates have used ABS 2016 population statistics these will likely be an underestimate given the population growth in Moreland since then.
- Estimated future impacts of Covid19 on employment by industry is highly uncertain due to the unprecedented nature of pandemic. Low and high scenarios have been modelled based on the most recent and appropriate estimates and sources available at the time of writing (see table 2 above). These should be considered indicative only, subject to further data, modelling and monitoring in the near future.
- These estimates currently include impacts in terms of reduced hours and/or job loss, however they do not account for those who may be receiving government assistance, for example Job Keeper Assistance. Estimates therefore do not directly translate to unemployment in all cases. Actual monitoring data on unemployment rates in Moreland collected by Federal Government departments (ABS, DESE, DSS etc.) will provide the most accurate data on Covid19 impacts on residents' employment in Moreland. This brief will be updated as relevant datasets become available, please check our website for the latest version.

Appendix 1: Baseline unemployment profile at 2016 population census for Moreland

Unemployment by age group (10-year age groups) baseline (ABS 2016)

Age group (10 years)	Unemployed, looking for work	% of all unemployed
10-19 years	752	13%
20-29 years	2,207	37%
30-39 years	1,191	20%
40-49 years	874	15%
50-59 years	609	10%
60-69 years	250	4%
70+	20	0%
Total	5,904	100%

Unemployment by sex baseline (ABS 2016)

Sex	Unemployed, looking for work	% of all unemployed
Male	3,246	55%
Female	2,657	45%
Total	5,904	100%
