

Raingarden Sloping Configuration C120.05

DESIGN STATEMENT

Water Sensitive Urban Design (WSUD) is an approach to improve sustainable use of water in the urban environment.

Raingarden can be 'tiered' to suit sloping sites. This minimises the drop heights into the rain garden, which increases safety and minimises the required excavation.

Moreland City Council Streetscape WSUD Raingarden and Tree Pit Design Package (WSUD Package) provides a suite of design elements, applications and standard drawings to assist WSUD site-specific design at the streetscape level.

APPLICABLE LOCATION

Steep sites, as specified.

COUNCIL STANDARD DRAWING

N/A

CROSS REFERENCE DOCUMENT

- Moreland WSUD Design Package

STANDARD SPECIFICATION

Refer to WSUD Package, Section 4. Autocad Library:

- Raingarden Sloping Configuration - Drawing SK005

SUPPLIER

Refer to WSUD Package, Section 10. List of Supplier.

MAINTENANCE

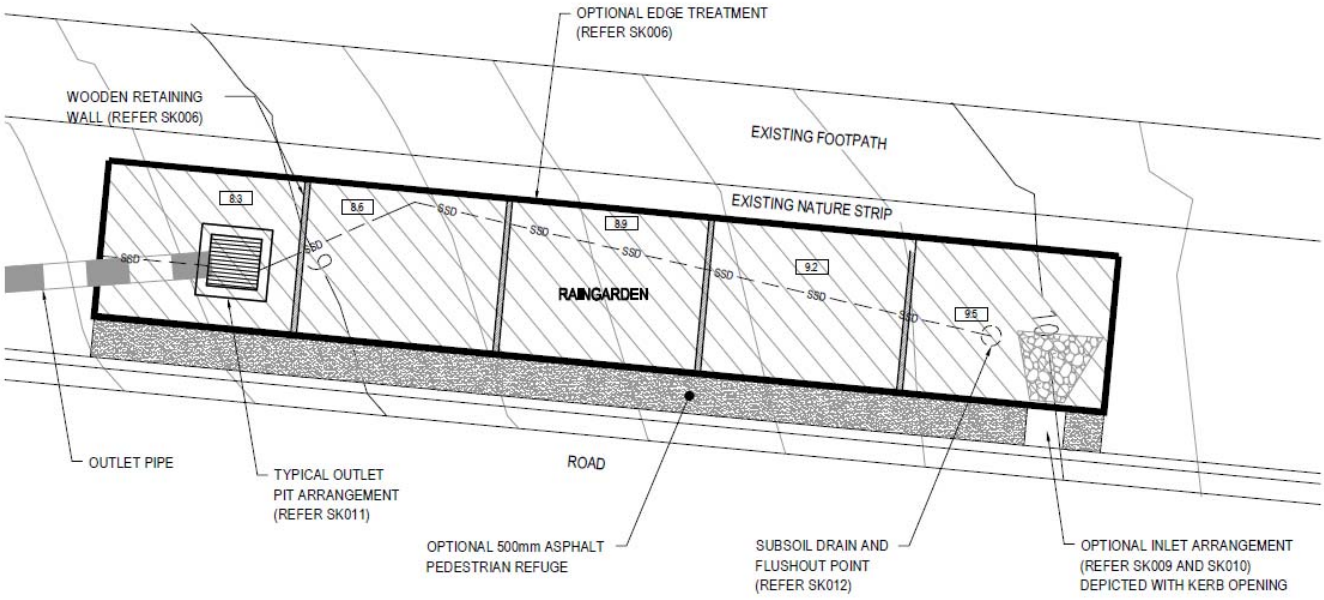

Refer to WSUD Package, Section 8. Maintenance Checklist.
