
Landscaping edges C200.03

DESIGN STATEMENT

Landscaping edges provide a visually pleasing edge treatment to delineate adjacent surface materials such as lawn and mulched garden bed. They also provide an effective edge restraint to landscape surfaces such as asphalt, gravel paths and along garden beds, contributing to ease of maintenance including weeding and mowing.

APPLICABLE LOCATION

Moreland parks and other open space

Use of edge type should be confirmed with relevant council units. Timber edge should generally be used for straight sections of edging. Steel edge should be used for straight and curved edges.
